

Vijay Kumar S J

 8073215462  vijaysj2000@gmail.com  vijay kumar sj  Bengaluru, India

Data Analytics professional with a strong academic background in **Statistics, Machine Learning, and Data Analysis**. Experienced in analysing complex datasets, developing statistical models, and building insightful visualizations using **Python, SQL, R, and Power BI**. Skilled in **time series forecasting, predictive modelling, and statistical analysis** to support data-driven decision making.

Skills

- Tools & Platforms: Python, SQL, Power BI, R, Excel
- Libraries & Packages: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Scipy
- Statistical Techniques: Hypothesis Testing, Regression Analysis, Classification, Clustering, ANOVA, Time-Series Analysis
- Machine Learning: Logistic Regression, Decision Trees, Random Forest, SVM
- Data Visualization: Power BI Dashboards, ggplot2, Matplotlib, Geographic Mapping
- Soft Skills: Communication, Problem-Solving, Teamwork, Attention to Detail

Education

Bachelor of Science in Economics, Mathematics & Statistics
Bengaluru City University

2018 – 2021
Bengaluru, India

Certificates

- Data analysis with python 
- M S Excel 
- Microsoft Power BI 
- SQL for Data Analysis 
- R-Programming 
- Data Visualization with Python 

Academic Project

Spatio- Temporal Crime Data Analysis and Forecasting Using Multivariate and Machine Learning Technique

- To summarize and visualize crime patterns using descriptive statistics and graphical representations.
- To examine multicollinearity among variables and reduce dimensionality through Principal Component Analysis (PCA).
- To apply Ridge and Lasso regression for robust modeling, with Lasso further used to identify the most significant predictors of crime.
- To perform K-Means clustering and validate the results using the Silhouette plot for detecting natural groupings in crime data.
- To use Geographic Information System (GIS) analysis to visualize and map crime distribution across districts.
- To analyze temporal crime patterns and forecast future trends using ARIMA time series modeling
